

Project Engineer in Esbjerg

Job Summary:

To service CMS contracts there is a need for both an Account Manager and a 'back office' function that ensures products and services are delivered to client as required. The Project Engineer position has expanded to encompass a wide range of duties that combine both external and internal work.

Typically, the Project Engineer will have responsibility for 2-3 customers or assets.

This position gives career opportunities within the Technical, Commercial or Operational departments within Production Technologies.

Essential Responsibilities and Duties:

External Customer Support

- Provide technical support to these customers, together with the technical specialists
- Run improvement projects
- Update customer pricing at regular intervals
- Ensure availability of chemical stock
- Contribute to quarterly client meetings and presentations
- Be a proactive contributor along with the Account Manager ensuring quality project work to clients
- Take part in Weekly/Monthly/ Quarterly Meetings with Client

Internal On- and Offshore support:

- Internal support for Account Manager when it comes to utilization of other Schlumberger functions
- Act as back-up for the Account Manager in the event of illness, holidays etc.
- Become familiar with the asset(s) being managed, to be able to offer offshore support along with Account Manager and Technical specialists.
- Act as a back-up to the tank management responsible in the event of illness, holiday etc.
- Ensuring management of chemical tanks for our clients
- Calculations of offshore stock and ensure correct amount of chemicals are sent offshore

Commercial

- Focus on continuous improvement aspects to the contract. This encompasses both efficiencies in process flow and commercial opportunities.
- Day to day focal point for Account Manager when access to documentation and internal services
- Provide stock data for all chemicals
- Present results and timelines for all Project Engineer projects
- Responsibility for all Project Engineer action points.
- Main contact point for out of normal office hours queries and emergencies.
- Contribute to all new Tenders received as part of the small local team. Tasks would be generated through the Tender lead for the project and work would be carried out in Porter.

Experience

- Good computer and Microsoft business systems skills (excel, word, PowerPoint)
- Experience working with SAP is an advantage but not a requirement

Project Engineer in Esbjerg

Behavior:

- Good communication skills in English
- Ability to work independently and in teams on projects
- Customer service
- Flexible, structured and solution oriented

Preferred Experience and Education:

- Bachelor's degree or higher within relevant field
- Fluent Danish and English, written and oral
